9.00h – 12.00h Dublin / 10.00h - 13.00h CET

Online Symposium organised by Kerona Scientific Ltd., Ireland

Programme

Kerona
Scientific Ltd.

Welcome to the 2026 Dublin Fertiliser Symposium

Dear colleagues,

It is a pleasure to welcome you to the Fourth Virtual Fertiliser Symposium. This annual event provides a focused platform to examine key developments within the EU Fertilising Products Regulation (FPR) landscape and to hear directly from leading stakeholders across the sector.

The symposium is designed to be concise, taking place over a single morning, and aims to deliver relevant, practical insights while accommodating delegates' working commitments. The virtual format ensures accessibility, allowing participants to engage fully while remaining connected to their daily responsibilities.

As the FPR legislation continues to evolve, with ongoing amendments and proposals, staying informed remains essential. We are grateful to the European Commission for sharing an up-to-date perspective on policy developments, and we extend our sincere thanks to all speakers for their contributions.

We encourage delegates to actively participate by submitting questions and sharing feedback, particularly on topics for future editions of the symposium. We hope this year's programme equips you with valuable knowledge to support your regulatory work and professional activities.

We wish you an engaging and productive symposium.

With every good wish

Irene McGrath
Managing Director
Kerona Scientific Ltd., Ireland
